WORK EXPERIENCE

[Accountant AI](#) , Full Stack Developer | Noida

Aug 2025 - Present

- Frontend: Developed responsive and modern user interfaces using React, Next.js, and TypeScript with reusable components and optimized performance.
- Backend: Built secure, scalable backend systems using Node.js, Python, Django, and PostgreSQL with real-time features powered by WebSocket and API integrations.

[Userology](#) , Frontend Developer Intern | Remote

Mar 2025 - May 2025

- Developed features as a Frontend Developer at Userology, an AI-powered user research platform.
- Employed **Next.js, TypeScript, Redux, Shadcn UI, Tailwind CSS**, and **REST APIs** in project implementations.

[NextOpson](#) , Frontend Developer Intern | Remote

Nov 2024 - Feb 2025

- Redeveloped the company's primary website with a **modern design** and **improved functionality**.
- Developed NextDeals, a new project website for the company's second real estate venture.
- Utilized **React.js, JavaScript, Tailwind CSS** and **REST APIs** to create **scalable, responsive, and user-friendly website**.

[Cuvette](#) , Full Stack Developer Intern | Remote

Mar 2024 – Aug 2024

- Completed a 6-month **full stack training and internship**.
- Developed 3 **full stack projects**.

PROJECTS

[Rent Vehicle](#) , [Code](#)

MAY 2025

Technologies: NextJs, TypeScript, Redux, NodeJs, ExpressJs, PostgreSQL, AWS, Redis

- Developed and maintained a **Full Stack Product** for vehicle owners and renters, facilitating seamless listing and searching of commercial vehicles.
- Implemented **live location updates** feature to enhance user experience and improve transaction efficiency.
- Integrated a **credit-based system** where renters can request vehicle owner contact details within a limited number of free credits; additional credits require purchase.
- Enabled vehicle owners to **publish, pause, or delete** their vehicle listings anytime for better availability control.

[Form Bot](#) , [Code](#)

Oct 2024

Technologies: React, JavaScript, Redux, Express, Node, MongoDB

- Built a **next-generation chatbot** platform to **replace traditional Google Forms** with an **interactive, conversational UI**.
- Implemented **secure user authentication**, storing **hashed passwords** in **MongoDB** using **bcrypt**.
- Enabled **admin users** to **create, update, and delete bots**, providing full CRUD control.
- Developed a **dynamic chat interface** that supports **images, text, date, Gif, rating, links and videos**, enhancing user engagement and input versatility.

[Task Manager](#) , [Code](#)

Technologies: React, JavaScript, Redux, Express, Node, MongoDB

- Implemented a **board assignment mechanism** where admins or users can **assign specific people to a board**—assigned users gain editing rights on posts without the ability to reassign or delete.
- Developed a **real-time analytics dashboard**, giving users insights into posts and activity across boards.

EDUCATION

Master Of Computer Science (MCA)

Jun 2023 - Jun 2025

Chandigarh University, Panjab, **CGPA: 8.05**
