

# Satyabrat Divedi

Full Stack Developer (2YOE)

+918318207464 • satyabratdivedi29@gmail.com • Noida, India • [Linkedin](#) • [Portfolio](#) • [Github](#)

## SKILLS

---

**Programming Languages:** TypeScript, Python, JavaScript

**Frameworks & Libraries:** React.js, Next.js, Express.js, Redux.js, Node.js, Django

**Databases:** MongoDB, AWS S3, PostgreSQL, Redis

**Tools & Platforms:** Docker, AWS, DigitalOcean, Prisma ORM, Mongoose, Kubernetes

## EXPERIENCE

---

**Full Stack Developer** | Accountant AI • Noida - (Ongoing) Aug 2025 – Present

- Built responsive and scalable user interfaces using **Next.js, Redux and TypeScript**, improving performance and component reusability.
- Developed backend systems using **Node.js, Django, and PostgreSQL**, handling secure API integrations and real-time communication with WebSockets.
- Integrated AI-powered workflows using **LangChain** for tool-calling and automation features.

**Frontend Developer Intern** | Userology • Remote - (3Months) Mar 2025 – May 2025

- Built scalable frontend features using **Next.js, TypeScript, Redux, and Tailwind CSS** for an AI-powered research platform.
- Integrated REST APIs and improved UI consistency using **ShadCN UI components**.

**Frontend Developer Intern** | NextDeal • Remote - (4Months) Nov 2024 – Feb 2025

- Redesigned company website with improved UI/UX and performance optimization.
- Developed **NextDeals**, a real estate platform using React and Tailwind CSS.

**Full Stack Developer Intern** | Cuvette • Remote - (6Months) Mar 2024 – Aug 2024

- Completed a 6-month full stack training and internship.
- Developed 3 full stack projects.

## PROJECTS

---

**Rent Vehicle - Code** | [GitHub](#) | [Live](#) **Jun 2025**

- Built a full-stack platform for vehicle rental with real-time location tracking.
- Enabled vehicle owners to **list, pause, and manage vehicles dynamically**.
- Implemented a **credit-based system** for accessing owner contact details.

**Form Bot - Code** | [GitHub](#) | [Live](#) **Oct 2024**

- Developed an AI-based chatbot platform replacing traditional Google forms with interactive UI.
- Supported multiple input types including **text, images, GIFs, ratings, and videos**.
- Implemented full CRUD functionality for bot management.

**Task Manager - Code** | [GitHub](#) | [Live](#) **Jul 2024**

- Built a secure task management system with authentication and role-based access.
- Designed a board system with controlled permissions for collaboration.
- Added sharing functionality with **read-only access control**.

## EDUCATION

---

**Chandigarh University** Panjab Jun 2023 – Jun 2025

Master Of Computer Science (MCA) • GPA: 8.05
